DETAILED ACTION

Election/Restrictions

1. This application is in condition for allowance except for the presence of claim 30 directed to an invention non-elected with traverse in the reply filed on 12/30/2005. As indicated in the previous Office Action, converting low resolution to high resolution in compressed domain is different from converting in the pixel domain, the examiner maintained the restriction requirement and made it final. Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.

Allowable Subject Matter

2. Claims 1-29 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter: The present invention relates to systems and methods for combining and transmitting compressed digital video data having different resolutions over communication channels. Various related prior art of record does not anticipate or render obviousness a system for providing a bitstream including compressed video

data, the system comprising: a tiling apparatus that receives first compressed video data at a low resolution and outputs tiled first compressed video data such that it is displayable using high resolution (a converting process from low to high resolution occurring in the compressed domain); and a combiner that receives the tiled first compressed video data displayable using the high resolution and receives second compressed video data at the high resolution and combines the tiled first compressed video data and the second compressed video data together to provide an output bitstream including the tiled first compressed video data and the second compressed video data as specified in claims 1, 7, 19, 23 and 27.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Nakase (US 6,738,169) discloses an image processing apparatus and method.

b. Jouppi (US 6,781,606) discloses a system and method for displaying images using foveal video.

c. Naimpally (US 5,589,993) discloses a digital high definition television video recorder with trick-play features.

d. Monroe et al (US 2002/0097322) discloses a multi video display.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
